

Alexandra Lúgaro was born on June 10, 1981 in San Juan, Puerto Rico. She graduated from the High School of the University of Puerto Rico at the age of 15 and was admitted to its Río Piedras Campus where she earned her Bachelor's degree in Business Administration with triple concentration in Finance, Marketing and Economics and subsequently her Juris Doctor.

In 2014, she obtained her Masters of Laws (LL.M.) from the Universidad Complutense de Madrid, where she is currently finishing her Doctorate in Financial and Taxation Law.

During the last decade she has served as Executive Director of corporations America Aponte and Associates and The Metropolitan New School of America, where she has drafted competitive proposals

for federal and state funds with which to implement innovative science-based educational initiatives in Puerto Rico. For the last 15 years, she has successfully directed dozens of educational projects and millionaire budgets, improving student academic achievement in over 500 schools in Puerto Rico.

On the other hand, through her private practice as a lawyer, she has provided legal assistance to those who are unfamiliar with the judicial system and can't afford adequate legal representation.

Faced with the notable deterioration in the social, economic and educational frameworks of the island, Alexandra Lúgaro has decided to do something on the matter; she will aspire to the governorship of Puerto Rico as an independent candidate in the next general election.

Lúgaro, has evaluated the budgets of the main agencies, studied the complex current situation, what countries with resources similar to Puerto Rico's have done to improve, all with the purpose of developing a serious and coherent Government platform. She has met with experts of all the ideologies and disciplines, people committed to the country that have provided her with their knowledge and experience.

She comes to work without any ties to individuals or entities and without fear of making the decisions that are necessary to improve Puerto Rico's social and economic panorama. Decisions she will base on scientific research and planning to implement strategies in what she esteems must be the two priority areas to be worked with: Economy and Education.

Lúgaro is aware that running as an independent candidate is a huge challenge, but as a Puerto Rican and as a mother, she knows very well the kind of country where she wants her daughter to be educated and live in. She is convinced that we have the human and fiscal resources to get up, what we have to do is administer them correctly and that precisely, is her greatest area of expertise.
