

Noel Zamot was recently appointed Infrastructure Revitalization Coordinator by the Puerto Rico Oversight and Management Board. He has over twenty-five years of experience in the aerospace & defense (A&D) industry, including government, commercial and startup ventures.

Zamot is the founder and president of the cyber security firm, Corvus Analytics in Bedford, MA, former Director of Air Force Programs, providing cyber security and system engineering brainpower.

He provided Program Management, Systems Engineering and Subject Matter expertise to US Air Force, US Navy, US Coast Guard and Federal Government customers and directed the US Air Force's elite Test Pilot School. He also represented the United States as Senior National Representative to NATO leadership.

He has a Masters of Business Administration in Sloan School of Management of MIT, a Masters in National Security Strategy of the National Defense University, a Masters of Science in Aerospace Engineering of the University of Michigan and a Bachelors of Science in Aeronautical and Aerospace Engineering of MIT.
