Mr. Ramon Ponte
Solution Specialist, Microsoft

Ramon Ponte has over 16 years of experience delivering enterprise architecture and advisory services to medium and large size organizations in Puerto Rico, the Caribbean and Central America. Industries of expertise include government, education, financial services, insurance, and the telecommunication sector.

As part of his current role, one of Ramon's main responsibilities consists on helping businesses understand how through technological solutions they can achieve their most challenging business and organizational goals.

Ramon began his career designing and developing solutions for a company based in Puerto Rico in the mid-90s. He soon got promoted and was asked to manage their solutions team. A few years later he joined Microsoft's enterprise group where he has been working for the past 10 years in various roles.

Mr. Ponte is frequently invited to speak at local and worldwide conferences and has written articles for various magazines. He holds a bachelor's degree in Electrical Engineering specializing in Computer Science. Ramon continues his education thru self-study and various industry certification programs.
